EDUCATION:

Shivaji University Kolhapur

MCA in Computer Science - Percentage - 83.66

SRTMUN

B.Sc. in Computer Science - Percentage - 75.63

July 2020 - June 2022

Kolhapur, Maharashtra

Apr 2017 - May 2020

Udgir, Maharashtra

CERTIFICATIONS & INTERNSHIP:

SOAL | Product Engineering Bootcamp Program

June 2023 – Present

- Solved 50+/Coding challenges on SOAL platform.
- Collaborated on various projects like Chrome Extension, Instagram Stories, E-Commerce Website.
- Technical Stack Learned: **HTML, CSS, JavaScript, Bootstrap, React, NodeJS, MongoDB. Express JS.**

Geekster | Web Development Trainee

Oct 2022 - June 2023

- Successfully addressed 200+ DSA/Coding questions on LeetCode and GFG platform using Java.
- Worked on various projects like Face Recognition Attendance, To-do Application.
- Technical Stack Learned: **HTML, CSS, JavaScript, Bootstrap, SQL and Java.**

EiSystem Technologies | Internship

Dec 2021 - Feb 2022

- Participated in various Coding contests organized by platform, showcasing skills, determination.
- Executed some projects like Hangman PC Game Project, QR Code Generator Application.
- Technical Stack Learned: **Python.**

PROJECTS:

Netflix Web App Clone [GitHub](#)

[Live Link](#)

- Created a React JS Netflix clone, mirroring the functionality and UI of the streaming platform.
- Implemented features like Authentication, Movie listing, and responsive design for various devices.
- **Tech Stack Used:** HTML, CSS, JavaScript, React JS, Redux, Firebase, API integration.

Imgur Image Clone App [GitHub](#)

[Live Link](#)

- This is a React JS Application which is a faithful clone of Imgur, the Image Sharing Platform.
- Utilized React component-based architecture to efficiently manage and update the UI.
- **Tech Stack Used:** HTML, CSS, JavaScript, React JS.

To-Do Application [GitHub](#)

[Live Link](#)

- A To-do list app lets users write, organize, and reprioritize their tasks more efficiently
- I have created this project to understand more about how CRUD operations work seamlessly
- **Tech Stack Used-** HTML, CSS, Bootstrap, JavaScript.

Face Recognition Attendance [GitHub](#)

- This is a Python-based Face Detection Attendance marking, visualization and GUI Application.
- Implementing machine learning algorithms for accurate face identification and tracking.
- **Tech Stack Used-** Python, OpenCV, Pandas, NumPy, and the tk-inter for the GUI.

TECHNICAL SKILLS:

Language: Java, JavaScript, SQL, HTML, CSS

Frameworks / Libraries: React.JS, React Native, Redux

Additional Courses: Full-Stack Web Development, Data Structures and Algorithm

Technical/Communication skill: Problem solving, Leadership, Decision-making, written and verbal communication skills, presentation skill.

ACHIEVEMENTS:

- Solved **200+** Data Structure and Algorithm problems on **Leetcode, Hacker Rank, GFG.**
- Consistently completed **100-DaysOfCode** challenge, showcasing daily progress on LinkedIn.
